

PILING / FINGER WORK ORDER

DEADLINE: AUGUST 16

Expand your layout or accommodate your bigger boat

- When you remove a piling, you can alter the layout of your boats to make it look more enticing and unique.
- You can also benefit by putting a wider beam boat in a slip. Your display affects the public's view and sales.
- Any slips that require piling work will be modified on **September 15** after that date adjustments cannot be made.
- The show does not receive any profit from the piling or finger work, it is a service offered to you.
